“Like New” Dual Head Vacuum, 2-Arm Rotary Placer

Serial Number: J1009-2A

Configuration

- Dual rotary vacuum valves with manual shutoff
- Venturi style vacuum pumps for both pick and carry
- Solenoid valves to control vacuum on pick
- Photo-eyes to verify pick
- Proximity switch with cam to trigger vacuum on pick
- Dual lane magazine
- Air separation
- External drive required

A 120° placement rotary feeder designed for the rigors of the manufacturing environment.

- Speeds up to 200 placements per minute.
- Maximum product size with two adjustable lanes is 12” width by 9-1/2” vertical.
- Magazine features quick adjustments for new product. This rotary is very versatile and can accommodate multiple products.
- Adjustable gravity feed magazine. Low maintenance magazine eliminates moving parts.
- Dual valve enables independent control of two lanes of product.
- Self contained Venturi vacuum system. The Venturi vacuum system is low maintenance with no moving parts.
- Machine constructed with high quality components, designed for low maintenance and a long service life.
