# CP CARTONER Features

## Consumer Product End-Load Cartoner

Flexibility to run smaller Single Serve Retail and larger Club Store / Retail Ready Packaging

The CP CARTONER is Graphic Packaging's newest fully-enclosed packaging machine designed for the Consumer Products market. This horizontal end-load cartoner is available in several pitches that provide a variety of size and speed ranges on a single machine to suit a broad range of applications.

### Key Features

#### Machine and Package Flexibility

The modular design allows many optional features, carton styles and product handling solutions on one machine; providing a single versatile packaging solution to suit a multitude of applications.

#### High Speed Packaging

Depending on configurations, the CP CARTONER can run small retail cartons at speeds up to 250ppm. Large club store and retail-ready dispensing cartons can also be run at significant speeds utilizing Graphic Packaging's unique Z-Flute strength carton design.

#### Complete Guarding

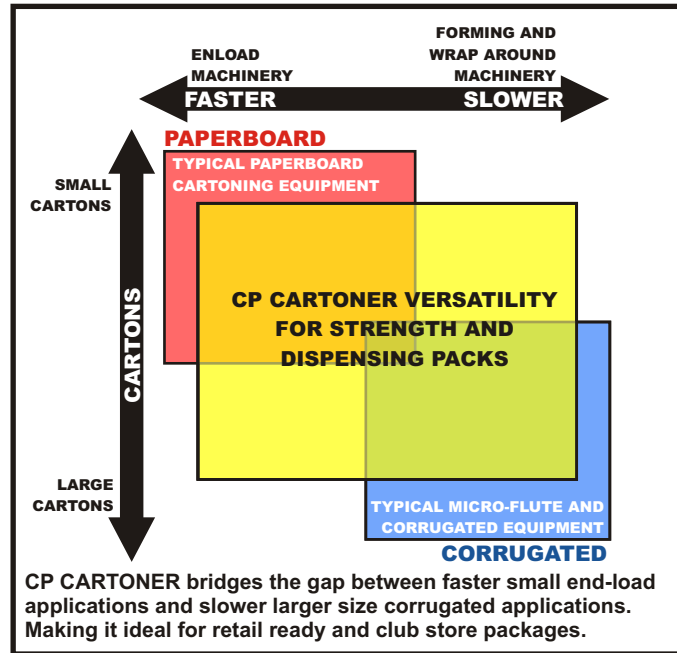

Full interlock guarding and low noise provides a safe, hazard-free environment for the operator.

#### Quick and Simple Changeover

The phaseable 4-chain flight system and easy access to all machine adjustments allow quick, repeatable, no-tool changeovers with on-the-machine storage of change parts.

#### Carton Feed

A choice of feeder styles provides efficient carton picking and erecting and features a no product / no carton function.

#### Controls

The CP CARTONER is easy to operate and features a color touch screen operator interface.

#### Low Maintenance

Modern materials, smart design and robust construction reduces maintenance upkeep and costs.

#### Machine Construction

The clean lines and stainless steel construction provide durability and excellent wash-down characteristics.

#### Experience

Graphic Packaging has been a provider of packaging machinery to some of the world's largest companies for over 40-years.

#### Machine Dimensions

23' Length, 8' Width  
(7m x 2.4m)

#### Carton Size Range
